1. The amendment and arguments filed on 06/08/06 have been considered.

Reasons for Allowance

2. Claims 1-20 are allowed.

Prior of record, Maeda et al., EP 0 905 608 A1, discloses including a method for control a detachment of a device using a timer. Maeda uses a time period T2 to indicate a detection of a disconnection of a device. In the case of re-connection from the disconnection, Maeda uses a predetermined elapse time T2+T3 to enable a reconnection of the device after the disconnection.

However, pointing out by Applicants in the Remarks section filed on 06/08/06, p.10-15, that the Maeda's time T2+T3 is not a predetermined time enabling a reconnection of a device. Applicants pointed out that time T3 is the time for deleting a device, not for reconnecting a disconnected device.

Therefore, the following is an examiner's statement of reasons for allowance: The cited prior arts taken alone or in combination fail to teach claimed invention as a whole as recited in such manner in independent Claims 1, 11, and 14.
